ARSHDEEP SINGH

Full-Stack Developer

(587) 837-3117 | arsh.016vs@gmail.com | github.com/arshdeepsingh11

PROFESSIONAL SUMMARY

Full-Stack Developer with hands-on experience shipping production React, Next.js, and Node.js applications, including AI-enabled healthcare solutions. Built and contributed to BioEMR (Electronic Medical Record platform) with AI features, HL7 configuration, HIPAA compliance, and Netcare/Connect Care integrations, plus 6+ live client websites across healthcare, finance, and aesthetics. Strong across frontend, backend, databases, DevOps (Docker, CI/CD, Vercel), testing, and Agile delivery. SAIT Software Development graduate seeking Junior Full Stack Developer roles focused on modern digital services and AI-driven solutions.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, Java, Python, SQL, HTML5, CSS3, C, C++
Frontend: React, Next.js, React Native, Expo, Tailwind CSS, Responsive Design, WordPress, Elementor
Backend & APIs: Node.js, Express.js, REST APIs, JWT Authentication, Prisma, Spring (basic), Supabase
Databases: PostgreSQL, MongoDB, Supabase (Postgres + RLS)
AI & Emerging Tech: Gemini API, AI document processing, AI safety guardrails, responsible AI practices, prompt engineering
DevOps & Cloud: Docker, Kubernetes, GitHub Actions, CI/CD Pipelines, Vercel, Linux, Git
Tools & Practices: Postman, Jira, Agile / Scrum, SDLC, Code Reviews, REST API Testing, HL7, HIPAA

PROFESSIONAL EXPERIENCE

Full Stack Developer

BioAro Inc · Calgary, AB
November 2025 – Present | Full-time (8 hours/day)

- Led development on BioEMR, a new Electronic Medical Record platform with modern AI-powered functionalities, proper HL7 configuration, full HIPAA compliance, and seamless integrations with Netcare and Connect Care; collaborated with the team on architecture, backend services, frontend modules, and end-to-end integration testing.
- Designed and shipped 6+ live client websites across healthcare, longevity, aesthetics, and finance using WordPress, Elementor, React, and Next.js, delivering responsive, branded, SEO-aware sites with booking and registration flows.
- Built Neyu, an AI health companion (Next.js, TypeScript, Prisma, Gemini API) for a Calgary cardiology clinic that answers patient questions using labs, reports, wearables, food logs, and check-ins while always displaying supporting evidence; also developed an AI document reader that converts uploaded/scanned medical reports into structured lab values and plain-language summaries.
- Designed a health insights engine that tracks longitudinal patient data, detects threshold-based changes, rates evidence strength, and optimizes AI costs; implemented AI safety guardrails (emergency detection, answer validation against real data, blocking diagnosis/medication advice) and doctor summary PDFs.
- Reduced production defects by 20% through functional, integration, and regression testing on the EMR platform; built JavaScript and Python automation scripts that cut manual testing effort by 30% and integrated them into CI pipelines for continuous validation.

Full Stack Developer

Visionaries Tech Solutions LLP · Amritsar, India
August 2022 – October 2023 | Full-time (8 hours/day)

- Developed and maintained responsive full-stack applications using React, Next.js, Node.js, Express, and REST APIs, improving client engagement, retention, and digital service quality.
- Built Business Intelligence dashboards and integrated PostgreSQL/MongoDB with cloud services, reducing reporting time and improving application uptime, reliability, and scalable data access.
- Applied software engineering best practices—testing, code reviews, source control, CI/CD, and secure development—across the full SDLC in Agile team environments.
- Translated business requirements into scalable technical deliverables spanning frontend, backend services, databases, and cloud platforms while collaborating with cross-functional stakeholders.
- Contributed to iterative continuous delivery of high-quality features, supporting backlog refinement, effort estimation, and clear communication to technical and non-technical audiences.

KEY PROJECTS

- ANRAHealth-New — Full-stack AI-powered health application with React/Next.js, secure data handling, and AI integration for patient-facing digital services.
- IMR-Movie-Portal — Full-stack web portal with dynamic content management, responsive UI, and backend services.
- Secure Auth App — React Native (Expo) app with email/password authentication, profile CRUD, and PostgreSQL Row Level Security policies.

EDUCATION & CERTIFICATIONS

Diploma in Software Development — SAIT, Calgary, AB | August 2025
Certifications: Advanced Java (Shinewave) · Web Development (IGEN) · C++ & C (Shinewave)
